

Start where you are. Grow towards what matters.

EAS connects practical AI learning with personal growth, judgement and evidence you can explain. Your next step may be a new role, a better way of working or greater confidence in everyday life.

Shared foundations. Different pathways. Continual growth.

Trust, ethics, privacy, security, inclusion and human judgement.

Reuse the core. Tailor the application. Retain your identity.

Build a dependable core

Develop safe habits around information, accuracy, fairness and human responsibility. Learn when AI is useful and when another approach is better.

Apply it to your goals

Choose suitable personal, creative or workplace examples. Practise asking better questions, checking outputs and explaining your choices.

Keep developing

Return when your goals, role or tools change. Progress can mean a refresher or a new application, not always moving to a higher level.

PLAN THE DELIVERY

Discuss an available route and the support you need. Confirm the cohort, dates, learning time, tutor input and accessible formats before joining; rolling enrolment or monthly clinics are not assumed.

AGREE THE OFFER

Agree fees, inclusions and any employer or sponsor support before enrolment. No bursary, job outcome or open-access place is guaranteed. Confirm any required third-party tools separately.

TRUST IN PRACTICE

Know which organisation supports your learning and who may see your work. An independent learner route needs a clear privacy arrangement. Keep personal and confidential information out of unapproved tools.

CHOOSE THE PATHWAY

Foundation and Bronze can provide a starting route where suitable. Existing capability should inform placement, with reviewed evidence guiding deeper Silver A, Silver B or Gold development.

EVIDENCE AND RECOGNITION

Build checked examples and reflections that help you describe your contribution. Share only appropriate material. EAS recognition follows the relevant review and is not a regulated qualification claim.

Bring your starting point, a goal and any support needs.

Discuss your learning route
